PORSELEN DUŞ KAROSU  
KATALOĞU

PORCELAIN SHOWER TILE CATALOGUE

The first part of the paper discusses the importance of understanding the cultural context of the research. It highlights how cultural differences can influence the interpretation of data and the design of the study. The author argues that researchers must be sensitive to these differences and adapt their methods accordingly. This is particularly true in cross-cultural research, where the researcher is often working in a new cultural environment. The paper then moves on to discuss the challenges of conducting research in a non-Western context. It notes that many of the assumptions and methods developed in Western research may not be applicable in other cultures. For example, the use of individualistic measures may not be appropriate in collectivist cultures. The author suggests that researchers should seek to understand the local context and develop methods that are culturally appropriate. This may involve working with local researchers or using indigenous knowledge. The paper concludes by emphasizing the need for a more inclusive and culturally sensitive approach to research. It calls for researchers to be aware of their own cultural biases and to strive for a more balanced and equitable representation of different cultures in their work.

# DÜNYADA İLK VE TEK

## THE FIRST AND ONLY ONE IN THE WORLD

Banyolar, tasarım bütünlüğü sağlayan, büyük ve göz alıcı bir yenilikle tanışıyor. Aquanit Porselen Duş Karosu'yla, duş zemini de duvar ve yer gibi tasarımın bir parçası haline geliyor. Dünyada ilk kez ve sadece Seranit Grup tarafından geliştirilen bu yenilikçi çözüm, küçük alanlar dahil tüm banyolarda mükemmel, kesintisiz tasarımlar yapmayı mümkün kılıyor. Dünyanın en büyük tasarım ödüllerinden biri olan A' Design Awards 2016'da Silver, XONE Seramik Tasarım Yarışması'ndaysa Gold ödülüne layık görülen ürün, sayısız yenilikle birlikte geliyor.

Seranit Grup portföyündeki birçok tasarım alternatifi arasında seçim yapmaya olanak veren Aquanit, hijyenik, dayanıklı yapısı ve kendine özgü sifon sistemiyle aynı zamanda tam bir çözüm paketi sunuyor. 80x80'den 90x135 cm'e uzanan boyut seçenekleri, ebatlandırılabilme özelliği ve farklı modelleriyle her mekana, her ihtiyaca cevap veren bu yenilikçi ürünle, banyo tasarımlarında yepyeni bir dönem başlıyor.

### DAYANIKLI

Aquanit, %100 porselen malzemeden üretilir, porselen karonun tüm özelliklerine sahiptir. Su emmez, dayanıklı ve uzun ömürlüdür. Kimyasallardan etkilenmediği için aşınmaz.

### HİJYENİK

Aquanit'in duvar ve yerle birleşim noktalarında silikon ya da derz uygulanmaz. Dolayısıyla kirlenecek, bakteri, küf veya mantar üremesine neden olacak hiçbir şey yoktur.

### EBATLANDIRILABİLME

Dört farklı ölçüye sahip olan Aquanit, aynı zamanda mekanın ihtiyacına göre ebatlandırılabilir. 80x80 cm - 90x90 cm - 80x120 cm - 90x135 cm

### ÇÖZÜM ODAKLI

Kendine özel bir gider sistemine sahip olan Aquanit, banyonuz için toplam bir çözüm paketidir. +/-12 mm sağa sola hareket eden bir eksantrik, helezon saç tutucu ve kapak alternatifleriyle birlikte gelir.

### ORJİNAL

Aquanit, dünyanın ilk ve tek porselen duş karosudur. Tasarımıyla ve özellikleriyle eşsizdir.

### KOLAY UYGULAMA

Aquanit, kolayca uygulanabilecek şekilde tasarlanmıştır. Tek parçadan oluşan gövdesi ile gider ve sifon elemanları hızlı, zahmetsiz bir şekilde montajlanır.

The introduction of a great and attractive innovation to bathrooms, one which ensures design integrity. With Aquanit Porcelain Shower Tile, the shower floor is incorporated in the design of bathroom floors and walls. Uniquely developed by the Seranit Group for the first time in the world, this innovative solution enables perfect, uninterrupted designs in all bathrooms including small areas. Awarded Silver in the A' Design Awards 2016 and Gold in the XONE Ceramic Design Contest, the product presents a variety of novelties.

Offering options among the many design alternatives provided in the Seranit Group portfolio, Aquanit presents a complete solution package through its durable structure and self-specific siphon system. With dimension options from 80x80 to 90x135 cm, resizability, as well as different models, this innovative product adapts to all needs and launches a brand new era in bathroom design.

### DURABLE

Aquanit is made of 100% porcelain material and bears all of the features of a porcelain tile. It is non-absorbent, durable and long-lasting. It does not wear out as it is not affected by chemicals and maintains.

### HYGIENIC

Silicon or grout is not required at Aquanit's wall and floor intersection points. Therefore, there is no cause for pollution, bacteria, mold or fungi generation.

### RESIZABILITY

With four different dimensions, Aquanit can also be resized according spatial needs. 80x80 cm - 90x90 cm - 80x120 cm - 90x135 cm

### SOLUTION-ORIENTED

With its self-specific discharge system, Aquanit is a total solution package for your bathroom. It is offered with an eccentric that can be moved right and left for +/-12 mm, spiral hair trap and cover alternatives.

### ORIGINAL

Aquanit is the first and only shower tile of the world. Its design and specifications make it unique.

### EASY APPLICATION

Aquanit has been designed for easy application. With its single-piece body, outlet and siphon elements are conveniently installed.

# Aquanit'e Türkiye ve dünyadan ödöl!

Aquanit is awarded in Turkey and in the World!

## A' DESIGN ÖDÜLLERİ 2016

A' Design Awards, İtalya'nın ve dünyanın en büyük tasarım ve inovasyon yarışmalarından biridir. Her yıl milyonlarca yeni ürünün çıktığı küresel dünyada, en iyi tasarımlara ve çözümlere dikkat çekmek için başlatılmıştır.

Farklı sektörlerde çalışan tasarımcıların, inovatörlerin ve markaların birçok farklı kategoride rekabet ettiği A' Design Awards, finalize edilmiş ürünlerin daha büyük marketlere ulaşmasını sağlarken, konsept aşamasındaki fikirleri de yatırımcılarla buluşturmaktadır.

## XONE Design ÖDÜLLERİ 2016

2013'ten bu yana Çimento, Cam, Seramik ve Toprak Ürünleri İhracatçıları Birliği ve Seramik Tanıtım Grubu tarafından düzenlenen Seramik Tasarım Yarışması, Türkiye seramik sektörünün uluslararası rekabet gücünü artırmak amacıyla başlatılmıştır. Bu yıl, global vizyonu doğrultusunda kimliğini XONE Tasarım Ödülleri olarak değiştiren yarışma; yeni malzemelerin getirdiği olanakları kullanan, çevreye duyarlı, sürdürülebilir, üretilebilir, yenilikçi ve uygulama kolaylığı sunan tasarımları ödüllendirmektedir.

## A' DESIGN AWARDS 2016

The A' Design Awards are one of the most prominent design and innovation contests in Italy and in the world. It was launched to bring attention to the best designs and solutions in the world, where millions of new products are introduced every year.

The A' Design Awards, in which designers, innovators and brands in many industries compete in a variety of categories, enable finalized products to reach greater markets and introduces concept ideas to investors.

## XONE Design Awards 2016

The Ceramic Design Contest, which has been held by the Cement, Glass, Ceramic and Clay Products Exporters Association since 2013, was launched in order to bolster the international competitive strength of Turkey's ceramic industry. The competition was renamed the XONE Design Awards this year in accordance with its global vision: it recognizes environmentally sensitive, manufacturable, innovative and convenient designs created through new materials.

# AQUANİT %100 PORSELEN KARODUR.

AQUANIT IS 100% PORCELAIN TILE.

## TEKNİK PORSELEN KARO NEDİR? WHAT IS PORCELAIN TILE?

Porselen karolar, çok ince bir karışım haline getirilmiş, kil ve diğer minerallerden oluşan yoğun bir gövdeye sahiptir. Güçlü preslerde basılan porselen karolar, 1250 C°'de pişirilerek tamamen su emmeyen çok sert bir yapıya kavuşurlar. Kir ve leke tutmadıkları gibi, donmalara karşı da dayanıklıdır. Kullanıldıkları mekan neresi olursa olsun, uzun yıllar renk ve güzelliklerini korumaya devam ederler. %100 porselenden üretilen Aquanit, porselenin tüm özelliklerini banyolara taşır.

Porcelain tiles have thick bodies composed of clay and other minerals combined in a superfine mixture. The porcelain tiles that are printed in strong presses are baked at 1250 °C to gain a very hard structure that does not absorb water. They are freeze-resistant as they are dirt and stainproof. Regardless of the application area, they maintain their color and beauty for a long time. Aquanit that is produced from 100% porcelain brings all the good qualities of porcelain to the bathrooms.

## Uygulama Alternatifleri Application Alternatives

### Kabin Profili Cabine Profile

**Kabin profili, Aquanit'e özel tasarlanmıştır. / Cabine profile is specially designed for Aquanit.**

Kabin profili, yalnızca 6 mm cam için uygundur.

Zemin tesviye şapı yüksekliği, kullanılacak sifon modeline göre değişebilir.

Uygulama alternatifleri, tercih edilen döşeme kotlarına göre değişebilir.

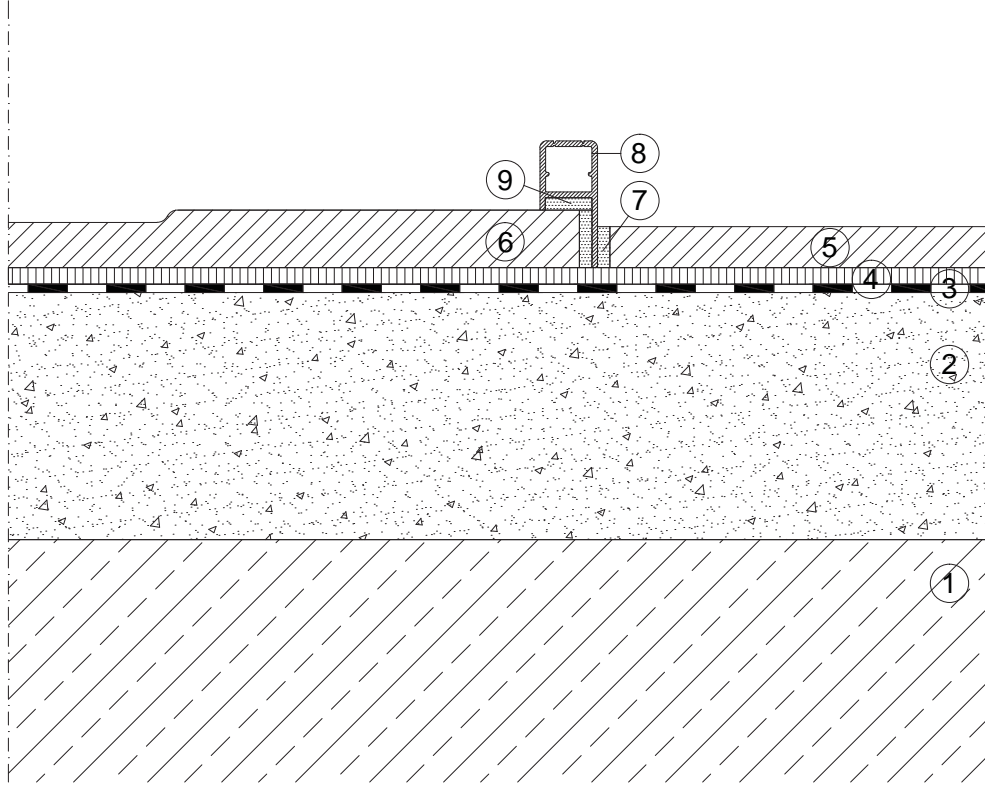

*The cabin profile can only be applied to 6 mm thick glass.*

*The floor's leveling screed height may vary depending on the siphon model to be used.*

*The type of application may vary depending on the preferred elevation.*

## Zemin Kot Farkı Uygulamaları - 1

### Floor Applications With Level Difference – 1

1. Betonarme döşeme
2. Zemin tesviye şapı
3. Islak mekan sürme izolasyon
4. Flex yapıştırıcı 4 mm
5. Banyo zemin Seranit/Serra karo 10 mm
6. Aquanit 14 mm
7. Flex derz dolgu 3 mm fuga
8. Su izolasyon ve kabin profili
9. Polimer sızdırmazlık

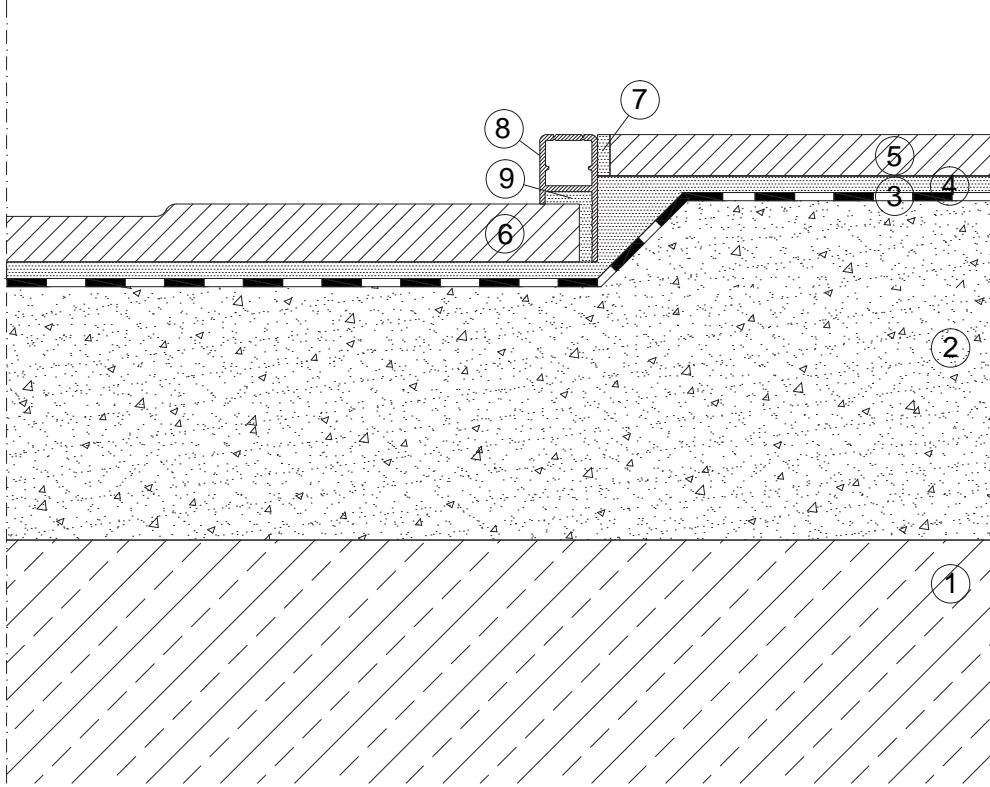

1. Concrete floor
2. Leveling screed
3. Wet insulation drive space
4. 4 mm flex adhesive
5. 10 mm ceramic or porcelain floor tile
6. Aquanit 14 mm
7. 3 mm grouting fuga
8. Water insulation and cabin profile
9. Polymer sealing

Zemin tesviye şapı yüksekliği, kullanılacak sifon modeline göre değişebilir.  
Uygulama alternatifleri, tercih edilen döşeme kotlarına göre değişebilir.

The floor's leveling screed height may vary depending on the siphon model to be used.  
The type of application may vary depending on the preferred elevation.

## Zemin Kot Farkı Uygulamaları - 2

### Floor Applications With Level Difference – 2

1. Betonarme döşeme
2. Zemin tesviye şapı
3. Islak mekan sürme izolasyon
4. Flex yapıştırıcı 4 mm
5. Banyo zemin Seranit/Serra karo 10 mm
6. Aquanit 14 mm
7. Flex derz dolgu 3 mm fuga
8. Su izolasyon ve kabin profili
9. Polimer sızdırmazlık

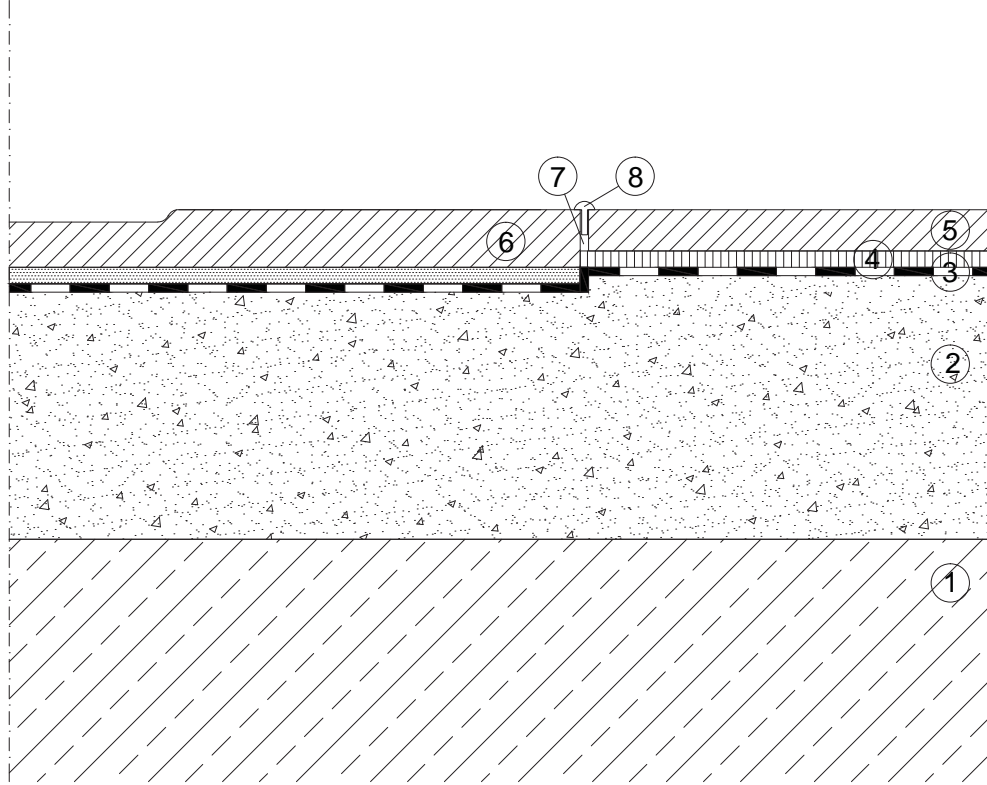

1. Concrete floor
2. Leveling screed
3. Wet insulation drive space
4. 4 mm flex adhesive
5. 10 mm ceramic or porcelain floor tile
6. Aquanit 14 mm
7. 3 mm grouting fuga
8. Water insulation and cabin profile
9. Polymer sealing

Zemin tesviye şapı yüksekliği, kullanılacak sifon modeline göre değişebilir.  
Uygulama alternatifleri, tercih edilen döşeme kotlarına göre değişebilir.

The floor's leveling screed height may vary depending on the siphon model to be used.  
The type of application may vary depending on the preferred elevation.

## Zemin Kot Farkı Uygulamaları - 3

### Floor Applications With Level Difference – 3

1. Betonarme döşeme
2. Zemin tesviye şapı
3. Islak mekan sürme izolasyon
4. Flex yapıştırıcı 4 mm
5. Banyo zemin Seranit/Serra karo 10 mm
6. Aquanit 14 mm
7. Flex derz dolgu 3 mm fuga

1. Concrete floor
2. Leveling screed
3. Wet insulation drive space
4. 4 mm flex adhesive
5. 10 mm ceramic or porcelain floor tile
6. Aquanit 14 mm
7. 3 mm grouting fuga

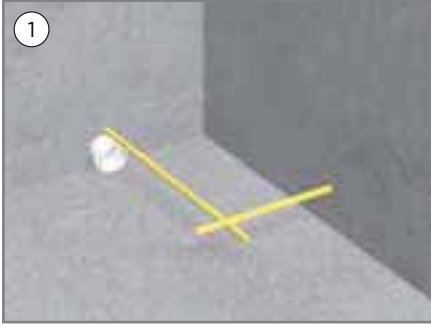

Zemin tesviye şapı yüksekliği, kullanılacak sifon modeline göre değişebilir.  
Uygulama alternatifleri, tercih edilen döşeme kotlarına göre değişebilir.

The floor's leveling screed height may vary depending on the siphon model to be used.  
The type of application may vary depending on the preferred elevation.

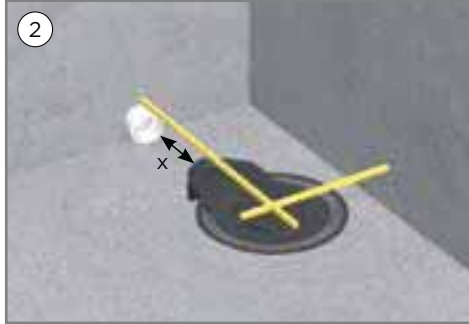

# Uygulama - Montaj Adımları

## Application - Installation Steps

Uygulama montaj adımları, yandan çıkışlı Multi, Basic, Basic Line için hazırlanmıştır. Detaylar için [www.aquanit.com.tr](http://www.aquanit.com.tr)'ye başvurabilirsiniz. / Application installation steps have been prepared for side outlet siphons and Multi, Basic, Basic Line. For more information visit [www.aquanit.com.tr](http://www.aquanit.com.tr)

**1**  
Teknik çizime göre sifon aks ölçüsü alınır ve sifon yeri belirlenir.  
Measure the siphon axis and locate the siphon according to the technical drawing.

**2**  
Sifonla, sifon yuvası arasını bağlayacak uzatma parçası x kadar kesilir ve yerine takılır.  
Prepare an extension piece with a length of x to connect the siphon with the housing and insert it in place.

**3**  
Tamir harcı konulur.  
Apply repair mortar.

**4**  
Sifon, sifon yuvasına yerleştirilir.  
Place the floor siphon into the housing.

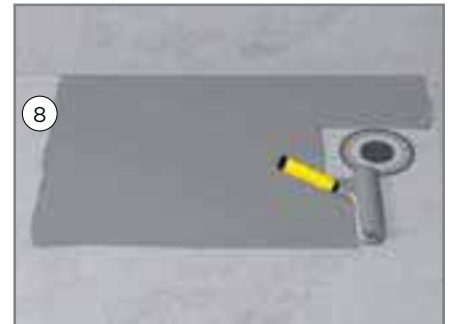

**5**  
Su terazisi ile şap ve sifon aynı seviyeye gelecek şekilde seviye kontrolleri yapılır.  
Check the screed and the siphon are on the same level.

**6**  
Sifon aks ölçüsü ayarlanır ve kontrol edilir. Tercih edilen uygulama alternatiflerindeki zemin kotuna göre yükseklik ayarlanır.  
Set and check the siphon axis measurement. Set the height according to the floor level of the desired application.

**7**  
Sabitlenen sifon aksının bozulmaması için tamir harcı donduktan sonra şap atılması önerilir.  
It is recommended to wait for the setting of repair mortar before screeding in order to keep the siphon axis intact.

**8**  
İzolasyon uygulamasından önce şapın donması önerilir.  
It is recommended to wait for the setting of screed before the isolation process.

### Uyarılar

- **Dikkat:** Uygulama bitirilene kadar ürün yüzeyindeki koruyucu film kesinlikle **sökülmemelidir**.
- Uygulamaları, verilen uygulama kılavuzu doğrultusunda yapınız.
- Uygulamadan önce kusur olup olmadığı kontrol edilmelidir. Montaj sonrası sorumluluk kabul edilmez.
- Kesme delme işlemlerinde ürüne zarar vermeyecek porselen kesici aletler kullanın.
- Uygulama öncesi daha detaylı bilgi için web sitemizden ([aquanit.com.tr](http://aquanit.com.tr)) bize ulaşabilirsiniz.

### Warning

- **Do not** rip off the protective cover film until the whole application is finished.
- Carry out the processes as explained in the user guide.
- Before implementation the product should be checked whether it has defect. No responsibility will be taken after installation.
- When cutting or drilling, use tools which are able to cut porcelain without damaging the product.
- You can contact us through our website ([aquanit.com.tr](http://aquanit.com.tr)) for more detailed information before the application.

# Uygulama - Montaj Adımları

## Application - Installation Steps

### Uygulama Adımları / Application Steps

**9** Aquanit Porselen Duş Karosu montajı için hazırlanan porselen yapıştırıcı zemine sürülür.  
*Apply the porcelain adhesive on the floor which was prepared for laying of Aquanit Porcelain Shower Tile.*

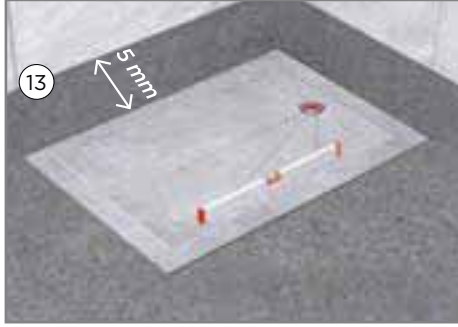

**10** Koruyucu kapak yerinden çıkarılır.  
*Remove the protective cap.*

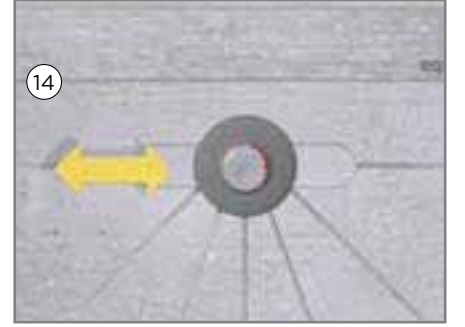

**11** Paket içinden iki parça halinde çıkan eksantrik ayar parçası, gidere yerleştirilir.  
*Install the provided two-piece eccentric adjusting element to the drain.*

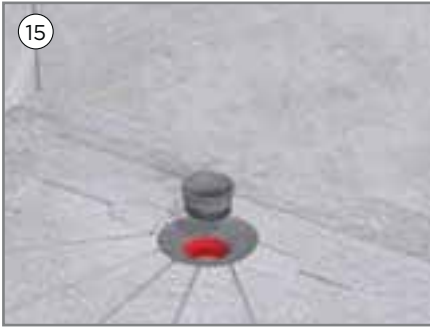

**12** Aquanit Porselen Duş Karosu arkasına porselen yapıştırıcı sürülür.  
*Apply porcelain adhesive to the back side of Aquanit porcelain shower tile.*

**13** Aquanit Porselen Duş Karosu yerine konulur.  
*Place Aquanit Porcelain Shower Tile.*

**14** Sifonun aksa gelmesi için gider boşluğundan eksantrik ayarı yapılır.  
*Perform eccentric adjustment from the drain gap to align the floor siphon with the axis.*

**15** Sabitleme parçası ile sifon, sisteme sabitlenir.  
*Fix the floor siphon to the system using the fixation piece.*

**16** Helezon saç tutucu yuvasına yerleştirilir.  
*Place the spiral hair trap into its housing.*

**17** Kapak montajı yapılır.  
*Install the cover.*

### Uyarılar

- **Dikkat:** Uygulama bitirilene kadar ürün yüzeyindeki koruyucu film kesinlikle **sökülmemelidir**.
- Uygulamaları, verilen uygulama kılavuzu doğrultusunda yapınız.
- Uygulamadan önce kusur olup olmadığı kontrol edilmelidir. Montaj sonrası sorumluluk kabul edilmez.
- Kesme delme işlemlerinde ürüne zarar vermeyecek porselen kesici aletler kullanın.
- Uygulama öncesi daha detaylı bilgi için web sitemizden ([aquanit.com.tr](http://aquanit.com.tr)) bize ulaşabilirsiniz.

### Warning

- **Do not** rip off the protective cover film until the whole application is finished.
- Carry out the processes as explained in the user guide.

# Sertifikalar

## *Certificates*

# Seranit ve Yeşil Binalar

## Seranit and Green Buildings

### Yeşil Bina Nedir?

### What is Green Building?

Yeşil Binalar; yapının arazi seçiminden başlayarak yaşam döngüsü çerçevesinde değerlendirildiği, bütüncül bir yaklaşımla, sosyal ve çevresel sorumluluk anlayışıyla tasarlandığı, iklim verilerine ve yerel koşullara uygun, ihtiyacı kadar tüketen, yenilenebilir enerji kaynaklarına yönelmiş, doğal ya da çevreye etkisi en aza indirilmiş malzemelerin kullanıldığı katılıma teşvik eden, ekosistemlere duyarlı yapılar olarak tarif edilebilir.

Green Buildings can be described as ecosystem sensitive buildings that are assessed starting from the land selection for their entire life cycle; designed with a holistic, socially and environmentally responsible approach, in accordance with climate data and local conditions, consuming as much as needed, using renewable energy sources, and built with materials that have a minimum natural and environmental impact.

Suyu daha verimli kullanmak | Using water more efficient

Enerjiyi daha verimli kullanmak  
Using energy more efficient

Malzemeleri daha verimli kullanmak  
Using material more efficient

Binaların çevresel etkilerini azaltmak  
Reducing the environmental impact of buildings

# Değerlendirme ve Sertifika Sistemleri

Dünyada birçok yeşil bina değerlendirme sistemi vardır. Bunlardan başlıcaları; BREEAM (Building Research Establishment Environmental Assessment Method), LEED (Leadership in Energy and Environmental Design), IISBE (International Initiative for Sustainable Built Environment), CASBEE (Comprehensive Assessment for Building Environmental Efficiency) ve DGNB'dir (Deutsche Gesellschaft für Nachhaltiges Bauen).

**BREEAM:** Breeam (The Building Research Establishment's Environmental Assessment Method) sertifika sistemi, dünyanın önde gelen ilk çevresel değerlendirme yöntemidir ve ilk kez İngiltere'de 1990 yılında BRE (Building Research Establishment) tarafından geliştirilmiştir.

## Breeam'ın Amacı:

- Binaların yaşam döngüsünün çevre üzerindeki etkisini azaltmak,
- Binaların çevresel faydalarına göre tanınmasını sağlamak,
- Binalar için güvenilir bir çevre etiketi sağlamak,
- Sürdürülebilir binalara olan talebi canlandırmak.

1990 yılında kurulduğundan beri 71 ülkede 532 323 BREEAM sertifikalı bina ve sertifikalandırma sürecinde olan 2,212.804 bina bulunmaktadır (Aralık 2015). Türkiye'de 22 tamamlanmış proje bulunmaktadır (Ağustos 2015).

## BREEAM'a göre puanlama 10 ana kategoride yapılır:

- |                              |             |
|------------------------------|-------------|
| • Bina Yönetimi              | • Ulaşım    |
| • Sağlık ve İyi Hal          | • Malzeme   |
| • Enerji                     | • Atıklar   |
| • Su                         | • Kirlilik  |
| • Arazi Kullanımı ve Ekoloji | • İnovasyon |

Her bir ana başlık, bulundukları ülke veya coğrafyanın koşullarına göre ağırlıklandırılmaktadır. Avrupa'da bina yönetimi'ne %12, sağlık ve iyi hale %15, enerjiye %19, ulaşım %8, suya %6, malzemeye %12,5, atıklara %7,5, arazi kullanımı ve ekolojiye %10, kirliliğe %10 ve inovasyona %10 ağırlık verilmektedir. BREEAM'ın bu yöntemi, onu diğer metotlara göre, farklı ülke ve coğrafyalara uyum konusunda avantajlı kılmaktadır.

**LEED:** Amerikan Yeşil Binalar Konseyi tarafından ilk defa 1998'de binaları sertifikalandırmaya başlayan LEED değerlendirme sistemi, inşaat sektörünün sürdürülebilirlik konusunda kendisini geliştirmesi amacıyla ortaya çıkmıştır. Amacı, günümüzde inşaat sektöründe kullanılan malzeme ve yöntemlerin zamanla sürdürülebilirlik prensipleri gözetilerek değiştirilmesi ve bu sayede doğaya en az şekilde zarar veren binaların yapılmasını sağlamaktır.

## Leed / Bu sistemin puanlaması 6 kategoride yapılmaktadır:

- Sürdürülebilir Araziler (14 puan)
- Su Kullanımında Etkinlik (5 puan)
- Enerji ve Atmosfer (17 puan)
- Malzeme ve Kaynaklar (13 puan)
- İç Ortam Hava Kalitesi (15 puan)
- İnovasyon ve Tasarım (4 puan)

Ayrıca 1 puan da, tasarımda LEED sertifikalı profesyonel uzman kullanmak yoluyla alınabilmektedir.

**DGNB:** Binaların planlamasında ve değerlendirilmesinde kullanılmak üzere kurulmuş bir sistemdir. Bir sınıflandırma sistemi olarak, tüm ilgili sürdürülebilir yapı konularını içermektedir. Şartlara uyan projeler; bronz, gümüş ve altın kategorilerinde sınıflandırılmaktadırlar.

# Assessment and Certification Systems

There are many green building assessment systems in the world. The leading ones are: BREEAM (Building Research Establishment Environmental Assessment Method); LEED (Leadership in Energy and Environmental Design); IISBE (International Initiative for Sustainable Built Environment); CASBEE (Comprehensive Assessment for Building Environmental Efficiency); and, DGNB (Deutsche Gesellschaft für Nachhaltiges Bauen).

**BREEAM:** The Breeam (The Building Research Establishment's Environmental Assessment Method) certification system is the first leading environmental assessment method; it was first developed by BRE (Building Research Establishment) in the UK in 1990.

## Breeam's Purpose:

- To reduce the environmental impact of building lifecycles
- To facilitate recognition of buildings according to their environmental benefits
- To provide a reliable environmental label for buildings
- To stimulate demand for sustainable buildings

Since its founding in 1990, there are 532,323 BREEAM certificated buildings in 71 countries and 2,212.804 building in the process of certification (December 2015). There are 22 defined projects in Turkey (August 2015).

## Scoring is performed in 10 main categories according to BREEAM:

- Building Management
- Health and Wellbeing
- Energy
- Water
- Land Usage and Ecology
- Transportation
- Material
- Waste
- Pollution
- Innovation

Each main topic is weighted according to the respective country's or geographical conditions. In Europe, building management is weighted at 12%; health and wellbeing at 15%; energy at 19%; transportation at 8%; water at 6%; materials at 12,5%; waste at 7,5%; land usage and ecology at 10%; pollution at 10%; and, innovation at 10%. This method used by BREEAM makes it more advantageous in regards to adaptation in different countries and regions, compared to other methods.

**LEED:** The LEED assessment system, which started to certificate buildings in 1998, was developed by the American Green Buildings Council with the purpose of improving the construction sector in the field of sustainability. Its goal is to change the materials and methods used in the construction sector today by considering sustainability principles and to construct buildings with a minimum impact on nature.

## Leed / Scoring in this system is performed in 6 categories:

- Sustainable Land (14 points)
- Water Usage Efficiency (5 points)
- Energy and Atmosphere (17 points)
- Materials and Resources (13 points)
- Indoor Air Quality (15 points)
- Innovation and Design (4 points)

Also 1 point is awarded by using a LEED certification professional during the design phase.

**DGNB:** It is a system designed for the planning and assessment of buildings. As a classification system, it covers all sustainable building topics. Projects complying with the conditions are classified according to bronze, silver or gold categories.

Değerlendirme Sistemi   Value System	Kriter   Criteria	Puan   Score
Leed	Malzeme ve Kaynaklar   Material and Sources	4
Breeam	Malzeme   Material	3
Dgnb	Çevresel Nitelik - Yerel Environmental Quality - Local	3

# Seranit Grup

2014 senesinde yer, duvar ve porselen karoları için aldığı EPD belgeleri sayesinde Seranit Grup yeşil binaların ilave puanlar almalarına yardımcı olmaktadır.

Yapılan EPD çalışmaları neticesinde 3 ürün grubunun da tüm yaşam döngüsü içerisindeki çevresel etkilerini ISO 14044'e göre hesaplayarak ürün odaklı 3. taraf onaylı beyanlarını yayınlayan Seranit Grup, Metsims Sustainability Consulting danışmanlığında ürünlerinin yalnızca karbon ayakizini değil EN 15804 standartlarına uygun olacak şekilde beşikten mezara tüm yaşam döngüsünde ozon tabakası tüketimi, asidifikasyon, ötrofikasyon gibi bir çok çevresel etkilerini de yayınladığı EPD Belgelerinde beyan etmiştir. Bu sayede de Seranit Grup yer, duvar ve porselen karo kullanılan Yeşil Binaların ödüllendirilmesine yardımcı olmaktadır.

**Porselen Karolar:** Porselen Karolar, pişirme işlemi sırasında hamuruna katılan çeşitli renkli tanecikler nedeniyle doğal taşlara benzer. Yer ve duvar karolarına göre daha dayanıklıdır. Bu yüzden, daha çok dış mekanlarda kullanılır. Bünyelerine su emmezler. Talebe göre mat veya parlatılmış olarak tüketiciye sunulur.

**Duvar Karoları:** Duvar Karosu, yer karosuna göre, daha hafiftir. Daha düşük ısılarda fırınlandığı için daha fazla su emebilir. Bu nedenle yer karolarına göre darbe dayanımı düşüktür. İç mekanlarda kullanıma uygundur. Yerde kesinlikle kullanılmaz. Seramikler, doğadan, doğal yollarla elde edilen maddelerden yapıldığı için sağlıklıdır ve çevreye az zarar veren ürünler olarak bilinirler.

**Yer Karoları:** Çok yüksek sıcaklıkta fırınlanmıştır. Bu nedenle duvar karolarına göre daha sert ve daha dayanıklıdır, istenildiği takdirde duvarlarda da rahatlıkla kullanılabilir. Darbelere karşı çok dayanıklıdır. Duvar karosuna göre daha ağırdır. Yük taşıma kapasiteleri çok yüksektir. Seramikler, doğadan, doğal yollarla elde edilen maddelerden yapıldığı için sağlıklıdır ve çevreye az zarar veren ürünler olarak bilinirler.

Seranit Porselen Avrupa Yapı Malzemeleri Yönetmeliği uyumlu EPD belgeli yer karosu ürünleriyle LEED, BREEAM ve DGNB gibi yeşil bina sertifika sistemlerinde aşağıda belirtilen puanları almalarında katkı yapmakta ve tercih edilmektedirler.

# Seranit Group

Thanks to the EPD certifications awarded for floor, wall and porcelain tiles in 2014, Seranit Group helps green buildings to receive additional points.

Seranit, calculating environmental impacts of all 3 product groups according to the ISO 14044 as a result of EPD studies, published the 3. party approved declarations, Seranit Group used Metsims Sustainability Consulting services to analyze not only carbon footprint but also many environmental impacts like ozone layer consumption, acidification, eutrophication during end-to-end life cycle and published them all on EPD documents. Hence, it helps in rewarding Green Buildings in which Seranit Group floor, wall and porcelain tiles are used.

**Porcelain Tiles:** Porcelain Tiles are similar to natural stones due to the various colored beads added to the mix during the baking process. They are more durable than floor and wall tiles. That is why they are widely used in outdoor spaces. They don't absorb water. They are offered on demand, as matte or shiny.

**Wall Tiles:** Wall tiles are lighter than floor tiles. As they are baked at lower temperatures, they may absorb more water. That is why they have a lower impact strength than floor tiles. They are suitable for indoor use. Do not use them on the floor. Ceramics are healthy, as they are made of natural materials through natural methods, and are known as products that have of an impact on the environment.

**Floor Tiles:** They are baked at very high temperatures. That is why they are harder and more durable than wall tiles; they can be easily used on walls, if desired. They have a high impact strength. They are heavier than wall tiles. They have a very high load carrying capacity. Ceramics are healthy, as they are made of natural materials through natural methods, and are known as products that have of an impact on the environment. .

Seranit Porselen helps in receiving the points indicated above for green buildings in the LEED, BREEAM and DGNB certification systems through its EPD certificated floor tile products that are in compliance with European Construction Material Regulations and therefore preferred.

## Çevresel Ürün Beyanı, EPD

### Environmental Product Declaration, EPD

Seranit Grup, tüm seramik ürün gruplarında; porselen karolar, duvar karoları ve yer karoları için EPD belgesine sahiptir. EPD belgesi alma sürecinde, ürettiği ürünlerin ham maddelerinin işlenmesinden üretime ve uygulanmasına kadarki tüm çevresel etkiler Seranit Grup tarafından değerlendirilip şeffaf olarak beyan edilmiştir. Seramik ürünlerine EPD belgesini alan Seranit Grup, müşterilerinin yeşil bina projelerindeki sertifika sistemlerinde yüksek puan almalarını sağlamaktadır. Seranit Grup EPD belgeleri sayesinde, ölçülebilir ve kıyaslanabilir sonuçlarla, uygulamacı ve yatırımcılara, kullanacakları yapı malzemeleri hakkında ulaşabilecekleri en doğru çevresel bilgileri sunmaktadır.

The Seranit Group holds EPD certificates for all its ceramic product groups, including porcelain tiles, wall tiles and floor tiles. In the process of the EPD certification, the Seranit Group reviews and transparently declares all environmental impacts from the processing of raw materials in its production and applications. With EPD certified ceramic products, the Seranit Group enables its customers to receive high scores during the certification process of their green building projects. Thanks to its EPD certificates, the Seranit Group offers implementers and investors the most accurate environmental information accessible on the respective building materials through scalable and comparable results.

## Yaşam Döngüsü Değerlendirmesi, LCA

### Life Cycle Assessment, LCA

LEED kriterlerinde yapı ürünlerinde ilave puan almak için LCA ve EPD belgelendirmelerini tamamlayan Seranit Grup, müşterilerine sertifikalandırma çalışmalarında ayrıcalık yaratmayı hedeflemektedir. Seranit Grup, dünyada hızla gelişmekte olan yeşil bina pazarlarında, müşterilerine avantaj yaratmakla kalmayıp, Avrupa Birliği yasaları ve ihracat pazarı gerekliliklerine de uyum sağlamayı amaçlamaktadır. Seranit Grup, LCA yaklaşımı ile eko-tasarım ve eko-inovasyon fırsatları altyapısını da hazırlamıştır.

The Seranit Group, which completed LCA and EPD certification processes in order to get additional points for its building products at LEED, aims to bring advantages to its customers during certification procedures. In addition to presenting its customers with benefits in the world's rapidly developing green building markets, the Seranit Group also aims to comply with the laws of the European Union and the requirements of the export market. The Seranit Group has also prepared the infrastructure for eco-design and eco-innovation opportunities through its LCA approach.

## İklim Beyanları

### Climate Declarations

Seranit Grup, tüm ürün ve faaliyetlerinde ortaya çıkan sera gazı salınımlarıyla ilgili farkındalığını artırmak ve stratejik önlemlerle küresel ısınma ve çevre konularında kendine düşen sorumlulukları yerine getirmek amacıyla, kapsamlı bir karbon ayak izi çalışması da yürütmüştür.

The Seranit Group carried out a comprehensive carbon footprint project in order to increase awareness in regards to the greenhouse gas emissions of all its products and operations, and to meet its responsibilities in global warming and environmental issues through strategic precautions.

## ECO Platform

### ECO Platform

Seranit Grup, ECO Platform üyeliği ile EPD belgeleri ve beyanlarının hem Avrupa'da hem de uluslararası düzeyde kullanılmasına olanak sağlamaktadır.

The Seranit Group enables the use of EPD certificates and declarations both in Europe and at the international level with its ECO Platform membership.
